Update on Brother and MUTOH Integration in EMEA

BIMH - Emmerich MUTOH Europe nv. – Oostende

October 27th, 2026

Dear Valued Partners and Customers of Brother Internationale Industriemaschinen GmbH (BIMH) and MUTOH Europe,

Following Brother's acquisition of MUTOH, we would like to share an update on our integration activities in EMEA and some key principles that have been guided and will guide how we operate our business going forward.

As we work towards building a stronger, more competitive organization by bringing together the strengths of Brother and MUTOH, we have established the following principles:

> We will continue to operate under both the **Brother and MUTOH brands** for the foreseeable future. We remain committed to developing and launching new products under both brands, leveraging the most suitable technologies and capabilities to address the diverse needs of our customers and applications.
>
> We highly value the relationships we have built with our dealers and partners over the years. **No existing dealer or partner relationship will be changed or terminated as a result of the acquisition.** We are working on strengthening our dealer network and partner program, taking into consideration existing partnerships, market coverage, each partner's strengths, commitment to our brands, and potential for future growth.
>
> Our ambition is to combine the complementary strengths of Brother and MUTOH to deliver greater value to our dealers, partners, and end customers **"at your side"**.

We will continue to keep you informed as our integration progresses and further plans are developed.

Thank you for your continued trust and partnership. We look forward to building a stronger future together.

Best regards,
Management of BIMH and MUTOH Europe nv
